# Quality special taps, dies and gages shipped fast!

North American Tool Corporation was established in 1986 to fill an expanding need for reliable, fast shipment of precision quality special taps, dies and gages in the industrial tooling market.

Our unique organization was created with three "Back To Basics" goals and ideals:

- Outstanding Customer Service;
- Quality Tools;
- Shipped On-Time.

### ***PARTNERING FOR SUCCESS***

We value and respect our efficient industrial distributor partnerships, and strive to fashion our business based on *their* needs. We will continue to develop strong partnerships with our distributors...born out of mutual respect, trust and down-to-earth communication.

### ***QUICK SHIPMENTS SAVE DOWNTIME***

We manufacture a complete line of special taps, dies and gages, available in most cases for ***same day shipment***. We also manufacture solid carbide taps, carbide insert taps, combination drill-and-tap, thread forming taps, thread milling cutters, PM taps, oil hole taps, and specials designed to your exact criteria. Our companion line of precision thread plug and ring gages is also readily available. Contact us for price and rapid shipment.

While the needs of today's global metalworking industry change, as well as the role of Industrial Distribution, North American Tool Corporation stands ready to meet those needs by incorporating the very ideals that have been the cornerstone of our success. Thank you for your interest in our products and services. We *really* do appreciate your business and the opportunity to be of service.

## Gaylee Corporation

A Subsidiary of North American Tool Corporation

"World-class tooling through team-driven commitment."™

# Specialists in precision 'thin saws'

For more than a quarter century, GAYLEE Corporation has been the saw industry's specialist in the design and manufacture of high precision:

- Solid carbide and carbide tipped saws and 'thin saws'
- Multiple saw gangs
- Special purpose saws, cutters, circular knives, etc.

### **PRECISION**

Our saws are precision tools, held to limits of accuracy and tolerance unsurpassed by most other manufacturers... a true benchmark to which others are compared. Where specified, tolerances measured in millionths of an inch can be provided.

### **DESIGNED FOR YOUR NEEDS**

Based on your job requirements, we will design the most efficient saw or cutter for you. Our engineering capability is well known for solving difficult, demanding, and unusual slitting, slotting, sawing, and cutting problems. GAYLEE also will manufacture saws to your sketch or print. For economy and ease of ordering, standardized precision saws are available in popular sizes.

### **COST SAVINGS & EFFICIENCY**

Gaylee carbide saws and cutters last longer, produce more, and give maximum value per dollar of investment. Saw design and materials will be tailored to your needs for:

- Accuracy and tolerances
- Maximum sharpening and saw life
- Maximum production speeds
- Minimum tooling costs
- 'In-the-cut' performance

For added life and improved cuts, tool coatings such as TiN (Titanium Nitride) and TiCN (Titanium Carbonitride) are available. Repair and resharpening of GAYLEE saws is also available at nominal cost.

### **IMPROVED PRODUCTION**

Our ultra precise saws make possible the extraordinary economies of multiple saw gangs. Among the many technological advances pioneered by GAYLEE are circular seating of carbide saw tips, micro-miniature saws and gangs, and many special purpose saws and cutting tools.
